Module Description:

This module manages all company-related operations within the internship and placement management system. It provides company registration and secure login functionality to ensure authorized access for recruiters. Companies can create and manage their profiles by maintaining details such as company name, email, phone number, location, and website information. The module enables companies to post internship and placement opportunities by providing details such as job title, description, eligibility criteria, required skills, stipend/package, and application deadline. Companies can view available student applications submitted for their posted opportunities and access uploaded resumes for candidate evaluation. The module allows recruiters to manage applicants by updating application status through actions such as shortlist, accept, and reject. It provides a centralized platform for companies to efficiently handle recruitment activities and simplifies the process of selecting suitable candidates.
